

## Torwel restructures operations, renews commitment to dealers

Alan McKenzie, President of Torwel Limited (formerly Marketing Manager of Ace Torwel), has announced the completion of Torwel's months-long business restructuring and return to full operation and sales as Torwel Limited, now with headquarters in Whitman. The Torwel brand has maintained a dominant market presence throughout the Northeast since its founding in 1946, renowned for its line of heavy duty Torwel spreaders, pickup truck spreaders including the widely popular Economizer line, and snow pushers. More than 10,000 Torwel units have been sold, all proudly manufactured in the USA.

"Faced with an opportunity to preserve the Torwel brand for future generations, we chose to consolidate operations, and resume business in good fiscal health," Mr. McKenzie said. "I am very pleased to report that Torwel Limited has purchased the assets and IP of Ace Torwel and has recommenced production. We are back on track, meeting and exceeding the demand for quality products and replacement parts with renewed commitment to our valued dealer network," he said.
